DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 9-17, 19, and 23 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 9-15, 17, 19, and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by *Torp et al* (US 6,099,471).

Torp et al anticipate all claimed features in claims 9-15, 17, and 19.

Claim 9: Torp et al disclose a method for displaying Doppler ultrasound image comprising receiving Doppler signal information including Doppler signal information which is not used to produce a displayed Doppler image such as strain velocity and B-mode data, processing Doppler signal information for display of a Doppler image is display 7, and analyzing Doppler signal information which is not used to produce a Doppler image to optimize at least one of the display parameters of the PRF, the color baseline, the color range polarity, or the range of color pixel values for display (col. 3, line 61 – col. 4, line 27; col. 4, line 55 – col. 5, line 10).

Claims 10-15, 17, 19, and 23: Torp et al disclose that the additional Doppler information processing includes M-mode image, colorflow, velocity profile, power setting, color intensity

and range, continuous scanning of the region of interest, and spectral representation of the Doppler flow information (col. 7, line 54 – col. 8, line 48).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over *Torp et al* as applied to claim 9 above, and further in view of *Seo* (US 4,501,279).

Torp et al substantially disclose all claimed features in claims 9 and 23. However, Torp et al do not explicitly disclose that the cyclic nature of PRF scan is applied with heart or cardiac cycle. However, the cardiac gating is used to represent the motion of the region of interest based on the cardiac cycle to display the parameters of Doppler information is well known in the art as demonstrated by Seo. Seo specifically disclose that the blood flow Doppler information is displayed with heart cycle parameter that causes periodic movement. Therefore, it would have been obvious to one having an ordinary skill in the art at the time the invention was made to apply the teachings of Seo's Doppler and heart cycle parameter with Torp et al's method described above to achieve the claimed invention.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
